

QuantumBerry AI

APPLIED AI ENGINEERING STUDIO · CAPE TOWN, SOUTH AFRICA

AI PROMPT PACK · TITANS CRICKET

Design the new kit. Keep every logo intact.

A storyboard-first workflow and four copy-paste prompts for designing the Titans men's and women's playing shirts and pants in Gemini or ChatGPT.

PREPARED FOR

Karen Smithies

Titans Cricket

ISSUED

October 2026

Revision 01

QUANTUMBERRYAI.CO.ZA

01 How it works

Start with a storyboard, then refine one step at a time. Each prompt is written in JSON so every detail sits in its own labelled field and nothing gets forgotten.

WHY

Storyboard first

Each run gives one page per idea: front, back, side, pants, close-ups, colours and a player wearing it. Make three, pick one, and every later step uses it as the reference.

WHY

JSON prompts

Gemini and ChatGPT both read JSON well. Copy the whole block, swap the {CURLY} words for your choices, paste it in. The last line repeats the brief in plain English.

RULE

Logos stay intact

Every prompt uses the attached official logo files with strict rules. The supplier drawings leave the logo spaces blank, and the real files go on last.

The workflow

00 One-time setup

Create a Gemini Gem or ChatGPT Project called "Titans Kit Design". Upload the official logos as transparent PNGs (TITANS_CREST.png, MOMENTUM_MULTIPLY.png, FIDELITY.png, KIT_SUPPLIER.png), the brand colour codes, and front, back and side photos of the current kit.

01 Storyboard

Prompt 1. Run three themes, compare the boards, pick one.

02 Production flats

Prompt 2. Clean supplier drawings of the chosen kit with blank, labelled logo spaces.

03 On-player hero shot

Prompt 3. A photoreal player in the kit for sign-off and social media.

04 Small changes

Prompt 4. One change per message, so the AI never redoes the whole design.

05 Logo check and finish

Zoom to 100% and compare every logo with the original file. Place the real logo files on the flats in Canva or Illustrator before anything goes to the supplier.

THE GOLDEN RULE

Attach the logo files to every prompt, even inside the Gem or Project. Image tools follow attached files far more reliably than stored ones.

02 Prompt 1 - Storyboard

Start here. Attach the logo files, fill in the words in {CURLY BRACKETS}, paste the block from the next page, and run it three times with three different themes.

Attach	Fill in	Run
All the official logo files	The words in {CURLY BRACKETS} below	Three times, three themes, then pick one board
CONCEPT_NAME	A name for the idea, e.g. Northern Thunder	
THEME	Pride of the north, lightning, heritage, modern speed or fan culture	
TEAM	Momentum Multiply Titans (men) or Fidelity Titans (women)	
FIT	Men's athletic fit or women's tailored fit	
MAIN_SPONSOR_FILE	MOMENTUM_MULTIPLY.png or FIDELITY.png	
PRIMARY / SECONDARY / ACCENT_HEX	Colour codes, e.g. #0B2D5B	
PATTERN_IDEA	e.g. subtle lightning lines, a diamond weave	
FORMAT	One-day or T20	

What you get back

SHIRT

Front, back and side

Symmetrical front view, back with name and number, side view showing sleeve and side panels.

PANTS

Front and back

Tapered playing pants with matching panels and piping.

DETAILS

Close-ups and colours

Collar, cuff, fabric texture, waistband, plus colour chips with hex codes and a number font sample.

MOOD

On a player

A small image of a cricketer wearing the kit in a floodlit stadium.

TIP

If a board puts a pattern over a logo or adds a sponsor that isn't attached, run it again rather than editing. The storyboard is cheap; the later steps rely on it being right.

PROMPT 1 · STORYBOARD · COPY THIS WHOLE BLOCK

```
{
  "meta": {
    "role": "Senior sportswear designer creating a professional kit concept board",
    "output": "One landscape concept board, 16:9, clean studio presentation"
  },
  "brief": {
    "team": "{TEAM}",
    "concept_name": "{CONCEPT_NAME}",
    "theme": "{THEME}",
    "format": "{FORMAT} coloured cricket playing kit",
    "colours": {"primary": "{PRIMARY_HEX}", "secondary": "{SECONDARY_HEX}", "accent": "{ACCENT_HEX}"},
    "pattern_idea": "{PATTERN_IDEA}, integrated subtly into side panels and sleeves, never over logo areas"
  },
  "board_layout": {
    "panel_1": "Hero front view of the playing shirt, flat lay, perfectly symmetrical",
    "panel_2": "Back view of the shirt with player name across the shoulders and a large number centred",
    "panel_3": "Side view showing sleeve, side panel and seam lines",
    "panel_4": "Cricket playing pants, front and back views, matching panels and piping",
    "panel_5": "Detail close-ups: collar, sleeve cuff, fabric texture (breathable athletic mesh), side vent, waistband",
    "panel_6": "Colour chips with hex codes and a sample of the number and lettering font",
    "panel_7": "Small mood image of a professional cricketer wearing the kit in a floodlit stadium"
  },
  "garment_specs": {
    "shirt": "Short sleeve, modern athletic cut, polo or V collar with placket, raglan sleeves, ventilated mesh side panels, sublimated print",
    "pants": "Tapered cricket playing trousers, elasticated waist with drawcord, side panels in kit colours, piping down the outer leg",
    "fit": "{FIT}"
  },
  "logo_placement": {
    "left_chest": "TITANS_CREST.png",
    "centre_chest": "{MAIN_SPONSOR_FILE}",
    "right_chest": "KIT_SUPPLIER.png",
    "sleeve": "Secondary sponsor file if attached, otherwise leave blank",
    "pants_left_thigh": "TITANS_CREST.png, small"
  },
  "logo_rules": {
    "source": "ATTACHED OFFICIAL LOGO FILES",
    "strictness": "Critical",
    "instruction": "Reproduce every attached logo exactly as supplied: identical shapes, letters, colours, spacing and proportions. Never redraw, restyle, recolour, simplify, warp, crop, outline or add effects. Scale uniformly only. Logos sit flat on the fabric following its curve, nothing more.",
    "if_unsure": "Leave a clean blank rectangle labelled with the logo file name instead of guessing."
  },
  "style": {
    "render": "Photorealistic fabric with realistic seams, stitching and drape, clean neutral grey studio background, soft even lighting",
    "presentation": "Premium sportswear brand concept board, tidy grid, small panel labels"
  },
  "negative_constraints": [
    "No redrawn or invented logos",
    "No extra sponsors",
    "No misspelt text",
    "No cartoon style",
    "No distorted garments",
    "No pattern over logo areas",
    "No watermarks"
  ],
  "combined_prompt_text": "Professional sportswear concept board, 16:9, for the {TEAM} {FORMAT} cricket playing kit, concept '{CONCEPT_NAME}', theme {THEME}, colours {PRIMARY_HEX} / {SECONDARY_HEX} / {ACCENT_HEX}, {FIT}. Panels: front shirt, back shirt with name and number, side view, pants front and back, detail close-ups, colour chips, small on-player mood shot. Use the attached official logo files exactly as supplied in the stated positions, never redrawn or restyled; if unsure, leave a labelled blank box. Photoreal fabric, clean grey studio background."
}
```

03 Prompt 2 - Production flats

Attach the storyboard you picked. The AI draws clean front, back and side drawings for the supplier and deliberately leaves the logo spaces empty.

Attach

The chosen storyboard image

Paste

Prompt 2 exactly as is

Then

Place the real logo files into the blank boxes in Canva or Illustrator

```
{
  "meta": {
    "role": "Technical sportswear designer preparing flats for a kit supplier",
    "output": "Two images: 1) shirt front, back and side; 2) pants front and back. White background, 4:3"
  },
  "reference": {
    "source": "ATTACHED CHOSEN STORYBOARD",
    "strictness": "Critical",
    "instruction": "Keep the design, colours, panels, pattern and proportions exactly as in the chosen concept."
  },
  "style": "Clean technical flat illustration, precise outlines, accurate seams and stitch lines, flat colour fills using the exact hex codes, no shading, no model",
  "logo_zones": {
    "instruction": "Do NOT draw any logo. Leave each logo position as a clean white rectangle with a thin grey border and a small label.",
    "zones": [
      "LEFT CHEST: TITANS CREST",
      "CENTRE CHEST: MAIN SPONSOR",
      "RIGHT CHEST: KIT SUPPLIER",
      "SLEEVE: SECONDARY SPONSOR",
      "PANTS LEFT THIGH: TITANS CREST"
    ]
  },
  "annotations": [
    "Collar style",
    "Fabric: breathable athletic mesh",
    "Panel colours with hex codes",
    "Name and number area on the back"
  ],
  "negative_constraints": [
    "No logos or brand marks of any kind",
    "No invented text",
    "No perspective distortion",
    "No background scenery"
  ],
  "combined_prompt_text": "Technical flats of the attached chosen Titans kit concept, design unchanged. Image 1: shirt front, back and side. Image 2: pants front and back. White background, precise outlines, exact hex colour fills, no shading. Do not draw any logos: leave a labelled blank rectangle at each logo position. Add short annotations for collar, fabric and panel colours."
}
```

WHY BLANK LOGO SPACES

Image AI can still slightly redraw a logo, even with strict rules. Leaving the spaces blank and placing the official files yourself is the only way to guarantee every logo is 100% correct on what goes to the supplier.

04 Prompt 3 - On-player hero shot

Attach the chosen kit image and the logo files. This gives the team a real-looking photo for sign-off and social media.

Attach	Fill in	Use it for
Chosen kit image plus the logo files	The words in {CURLY BRACKETS} below	Sign-off, launch posts and sponsor previews
CRICKETER	e.g. fast bowler, mid-20s	
ACTION	e.g. at the point of delivery	
MAIN_WORD	RISE, ROAR, TITANS or BELIEVE	
ENVIRONMENT	e.g. floodlit night match at a packed stadium	
ACCENT_HEX	The accent colour from the chosen kit	

What makes it look real

- **Connected perspective:** body, arm, hand and bat or ball form one believable line toward the camera.
- **Real skin and sweat,** not plastic or airbrushed.
- **Floodlight rim light** outlining the player against a full-bleed stadium.
- **One bold word** behind the player in the kit's accent colour, partly hidden by the body for depth.

CHECK BEFORE SHARING

Look closely at hands, the bat and every logo. If a logo is off, place the official file over it in Canva before the image is used anywhere.

PROMPT 3 · ON-PLAYER HERO SHOT · COPY THIS WHOLE BLOCK

```
{
  "meta": {
    "role": "Elite sports campaign photographer and retoucher",
    "output": "One photorealistic campaign image, 9:16 vertical"
  },
  "subject": {
    "who": "Adult professional cricketer, {CRICKETER}",
    "skin_and_face": "Natural skin texture, real sweat sheen, focused determined expression"
  },
  "wardrobe": {
    "source": "ATTACHED CHOSEN KIT DESIGN",
    "strictness": "Critical",
    "instruction": "Dress the player in the attached kit exactly: same colours, panels, pattern, collar and pants. Fabric stretches and folds naturally with the movement."
  },
  "logo_rules": {
    "source": "ATTACHED OFFICIAL LOGO FILES",
    "strictness": "Critical",
    "instruction": "Reproduce every attached logo exactly as supplied: identical shapes, letters, colours, spacing and proportions. Never redraw, restyle, recolour, simplify, warp, crop, outline or add effects. Scale uniformly only. Logos sit flat on the fabric following its curve, nothing more.",
    "if_unsure": "Leave a clean blank rectangle labelled with the logo file name instead of guessing."
  },
  "action": {
    "pose": "{ACTION}",
    "perspective": "Connected forced perspective: body, arm, hand and bat or ball form one continuous believable line toward the camera",
    "motion": "Frozen peak moment, fine dust or grass flecks in the air"
  },
  "typography": {
    "main_word": "{MAIN_WORD}",
    "style": "Huge bold condensed letters behind the player, colour {ACCENT_HEX}, partly hidden by the player's body for depth",
    "rule": "Spell the word exactly, no other text anywhere"
  },
  "environment": {
    "setting": "{ENVIRONMENT}",
    "framing": "Full-bleed stadium background, no borders, no footer band"
  },
  "lighting": "Dramatic floodlight rim light outlining the player, soft fill on the face, crisp contrast",
  "camera": {
    "lens": "35mm",
    "aspect_ratio": "9:16",
    "focus": "Tack-sharp on the player and kit, background gently blurred"
  },
  "negative_constraints": [
    "No floating or duplicated equipment",
    "No distorted hands or extra fingers",
    "No plastic or airbrushed skin",
    "No redrawn, warped or invented logos",
    "No extra sponsors",
    "No footer band or frame",
    "No misspelt text"
  ],
  "combined_prompt_text": "Photorealistic 9:16 cricket campaign image of an adult professional cricketer, {CRICKETER}, {ACTION}, wearing the attached Titans kit exactly as designed. Connected forced perspective toward the camera, frozen peak moment. Huge condensed word '{MAIN_WORD}' in {ACCENT_HEX} behind the player, partly hidden by the body. {ENVIRONMENT}, full-bleed stadium, floodlight rim light, 35mm, tack-sharp subject. Use the attached official logo files exactly as supplied, never redrawn. No distorted hands, no floating equipment, no plastic skin, no footer band."
}
```

05 Prompt 4 - Small changes

Use this whenever you want to adjust one thing. It stops the AI from redoing the whole design.

Attach

The image you want to adjust

Change

One thing per message

ChatGPT tip

Use the select tool to paint over only the area to change

```
{
  "edit_mode": "Surgical edit of the attached image",
  "change_only": "{ONE CHANGE, for example: make the collar {ACCENT_HEX}}",
  "keep_identical": [
    "Every logo, pixel for pixel",
    "All other colours",
    "Pattern and panel layout",
    "Garment shape and proportions",
    "Background, lighting and camera angle"
  ],
  "rule": "If the change would affect anything in keep_identical, change less, not more."
}
```

Women's kit

Run Prompt 1 again with **TEAM** = Fidelity Titans, **FIT** = women's tailored fit and **MAIN_SPONSOR_FILE** = FIDELITY.png. Keep the same concept name and colours so the two kits read as one family.

Gemini or ChatGPT?

Both work. Gemini tends to hold a design steadier across edits; ChatGPT's select tool is the easiest way to change one small area. Try the same storyboard prompt in both and keep whichever you like.

Logo checklist before anything is approved

- **Zoom to 100%** and compare each logo with the original file, letter by letter.
- **Reject** any image with a changed letter, shape, colour or proportion.
- **Final files:** the official logos are placed by hand on the production flats.
- **No extra sponsors** or text the AI added on its own.

NEXT STEP

Chad will take you through these prompts on a short call and run the first storyboard with you.
